

JARRETT TS360 FINISHING PARK MOWER

General construction

- RHS chassis fully welded and capped
- Spindle mounting plates from 8mm steel
- Spindle plates mounted between RHS chassis
- A-frame bolted to main deck
- Clean deck design for easy cleaning without removing safety covers
- Safety covers in heavy duty Aluminium tread plate
- Steel deflectors allow an even rear discharge of cut material

Jarrett spindles

- Jarrett spindles manufactured in Australia
- Sealed oil bath lubrication for minimum maintenance
- Precision machined heavy duty cast iron housings
- Internally mounted oil seals
- Heavy duty 6308 ball bearings
- Precision machined 'Duraflex' 40mm diameter shaft
- Tapered spline shaft for pulley and cutter base

Wing deck models

- **TS360** 3.6m, 5-spindle
Main Deck, front & rear rollers
Wings, rear rollers
Min 60 hp req
Approx weight: 950kg

Cutter heads

- Tapered spline lock mounting to spindle shaft
- Standard 4mm finishing tip blades
- More flexibility for varying mowing conditions
- High tip speed ensures superior cut
- Large rear clearance for maximum grass discharge

Pulleys

- All drive pulleys are 4-groove, cast iron
- Machined deep groove 'B' section belt profile
- Large wrap around belt surface contact for superior grip and drive
- Tapered spline lock mounting to spindle shaft

Idler pulleys

- Large diameter B section pulley
- Sealed bearings
- Simple adjustment for belt tensioning

Belts

- Unique belt configuration allowing greater wing movement both up *and* down
- Easy access to all drives

Options

- Wing skid front rollers
- As the manufacturer we are happy to discuss your particular requirements

JARRETT TS360 FINISHING PARK MOWER

"This mower operates perfectly over undulations and gives an excellent distribution of the cut litter." — T.A., Snr Plant Operator

The Jarrett TS360 Finishing Park Mower

The TS series finishing park mower is our latest addition to the family of Jarrett wing deck mowers, featuring the TS360 with a cutting width of 3.6 metres.

As usual, there are various blade and roller options available, plus the Jarrett belt and pulley system which will handle mowing in thick and wet conditions!

The wings will rise *and fall* allowing better mowing of undulating ground! This makes the TS series even more versatile, while still maintaining the Jarrett traditional build quality, reliability and low maintenance features.

"As usual, this Jarrett mower is engineered properly, with it's low maintenance design and strength, plus easy access to everything. It's so simple to clean, maintain & operate, which saves a lot of time!"— Plant Operator, Major Regional Council

Many councils and contractors are operating Jarrett finishing park mowers today and, after years of service, they are now adding even more to their fleet! A sound testament to the quality, reliability and performance of Jarrett mowers.

Standard Inclusion:

- Wing skid front rollers

Manufactured in Sydney and using all-Australian content, the TS series continues to raise the standard of finishing park mowers!
